COVER

88pt. binder's board

Ecological Fibers Brillianta book cloth

ENDPAPERS

Finch fine text, 100#

Pantone 116U spot ink

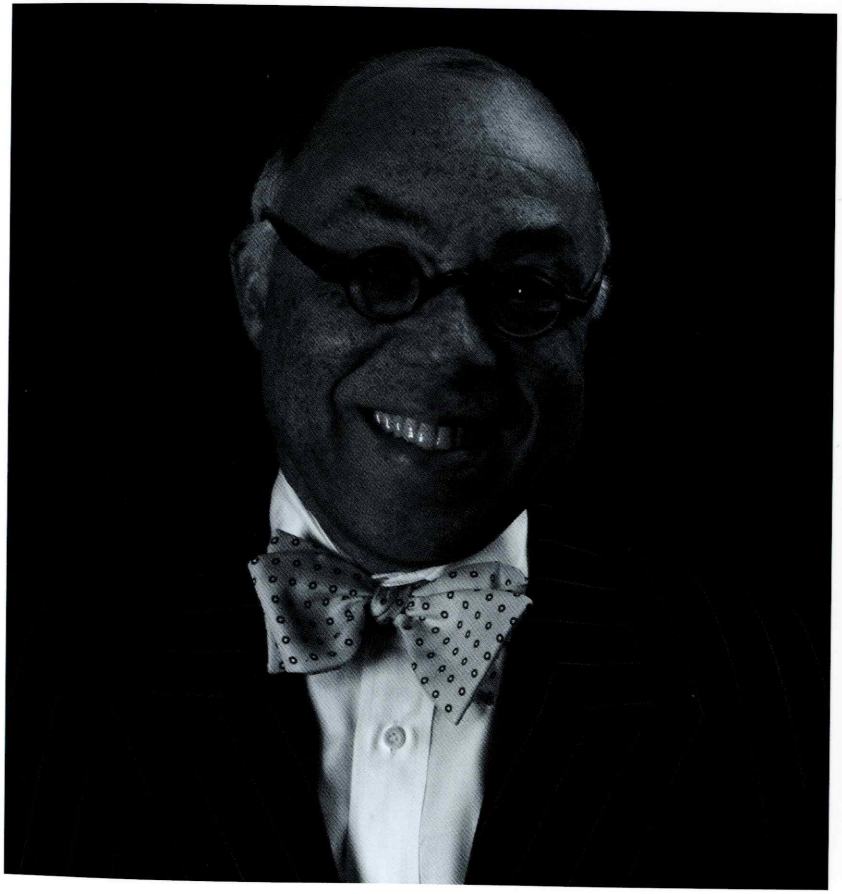
*

Congratulations to members of the graduating class of 2008 on earning your degrees from The Cooper Union for the Advancement of Science and Art, one of the nation's most selective and most distinguished institutions of higher education.

Your time here has come at a very special period in Cooper Union's history. We initiated a major transformation, launched the renewal of our academic facilities and substantially strengthened our endowment to ensure that future generations of students will have the same opportunities that you had – a full tuition scholarship and a unique higher education experience.

Now approaching the sesquicentennial of Cooper Union's birth, we are preparing to celebrate the institution's tradition of excellence. Over the years, our alumni from the Albert Nerken School of Engineering have made immense contributions to science and technology, from the discovery of the binary pulsar, which led to the Nobel Prize in physics, to the building of New York's infrastructure to major innovations in the early detection of certain kinds of cancer. The School of Art has produced some of the greatest artists of the 19th and 20th centuries, beginning with Augustus St. Gaudens, and is having a major influence on new forms of artistic expression today. The impact of the Chanin School of Architecture can be seen among the great cities worldwide, including the New York buildings designed by alumnus, Irwin S. Chanin himself.

The gift of a Cooper Union education comes with the expectation that you, too, will apply your formidable talents to make a measurable difference in the world; and that you will join with your fellow alumni in perpetuating the extraordinary legacy of Peter Cooper.



George Campbell Jr., Ph.D.

New York, NY

PRESIDENT OF THE COOPER UNION
